

## **Experiment 1**

### **Title**

### **Fibonacci Series Generation**

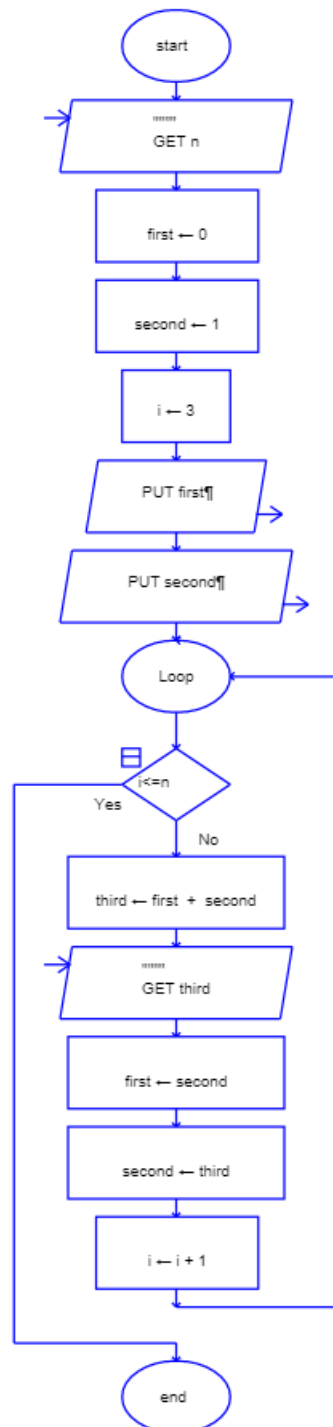

### **Aim**

To generate the Fibonacci series up to N terms using RAPTOR.

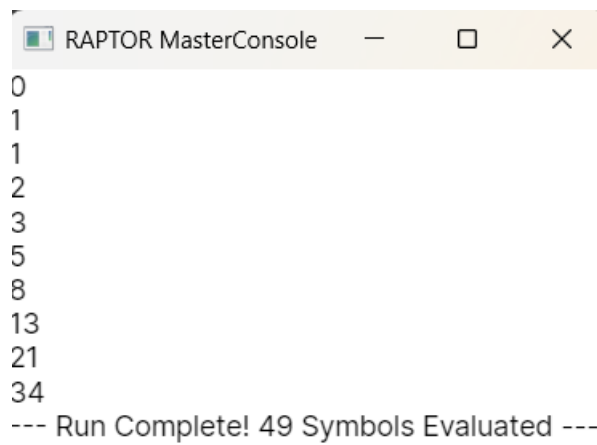

### **Algorithm**

1. Start.
2. Read the number of terms (N).
3. Initialize first = 0 and second = 1.
4. Display the first two numbers.
5. Repeat until N terms are generated:
  - Calculate next = first + second.
  - Display next.
  - Update first and second.
6. Stop.

## Flowchart Screenshot

## Output Screenshot

```
RAPTOR MasterConsole
0
1
1
2
3
5
8
13
21
34
--- Run Complete! 49 Symbols Evaluated ---
```

Clear

## Result

Thus, the Fibonacci series was generated successfully using RAPTOR.
